DEVOPS / PLATFORM / OCI

Abderrahmane Ouroui

OCI Platform Engineer | DevOps Engineer

Casablanca, Morocco

abdououroui123@gmail.com | aouroui.dev | LinkedIn | GitHub

PROFESSIONAL SUMMARY

OCI-focused Platform / DevOps Engineer building secure, observable production runways with Terraform, OKE/Kubernetes, IAM, networking, CI/CD, and MLOps/data foundations. OCI is my deepest production environment; the standards I apply are cloud-portable: Infrastructure as Code, least-privilege access, release promotion, observability, cost-aware governance, and Kubernetes operating patterns adaptable across AWS, GCP, Azure, or other cloud primitives.

EXPERIENCE

DevOps Engineer II / Platform Engineer, Oracle — **2023–Present**

Casablanca, Morocco

- Refactored and migrated Terraform-managed OCI infrastructure while protecting 500+ resources per environment from unnecessary recreation.
- Designed controlled OCI network and identity paths across load balancers, API gateways, Traefik, Kubernetes services, and third-party authN/authZ flows.
- Operated OKE/Kubernetes workloads with release validation, rollback planning, post-release monitoring, and production troubleshooting.
- Built observability patterns using OCI Logging, OCI Monitoring, Grafana dashboards, alarms, and runbooks to improve incident detection and triage.
- Enabled AI/MLOps-ready foundations with OCI Data Science, MLflow, Object Storage, Data Flow, Spark, and model artifact workflows.
- Supported beta programs, workshops, POCs, and GA readiness while mentoring teammates and improving platform adoption.

Research Assistant, Oracle — **2023**

Casablanca, Morocco

- Delivered Java/Groovy backend services and CI/CD workflows with Gradle, Jenkins, GitLab, JUnit, and Mockito.

Full Stack / Web Developer, diaaland, INTELLCAP SARL — **2021–2022**

- Built customer-facing web apps and third-party integrations with React, GraphQL, PHP/WooCommerce, NestJS, MongoDB, Strava, and Garmin.

PROJECTS

OCI Platform Foundation: Repeatable dev/test/stage/prod foundation for secure cloud workloads. | Terraform, IAM, VCN, OKE, Autonomous Database

Terraform-Safe Migration: State-aware infrastructure and data migration work with reduced recreation risk. | Terraform state, OCI resources, data transition

Secure Network Edge: Private ingress and identity-aware access patterns for production services. | API Gateway, Load Balancer, Traefik, AuthN/AuthZ

OKE Release Runway: Kubernetes delivery flow with validation, environment promotion, and rollback readiness. | Kubernetes, CI/CD, promotion checks, rollback

Observability: Operational visibility for incident triage, reliability checks, and platform health. | Grafana, OCI Logging, OCI Monitoring, alarms, runbooks

MLOps / Data Foundation: Reproducible artifact flow for data and ML workflows on OCI. | MLflow, Object Storage, Data Flow, Spark/PySpark

TECHNICAL SKILLS

Cloud Platform

OCI, IAM, VCN, Load Balancer, API Gateway, Compute, Object/Block Storage, Autonomous Database, OKE, Logging, Monitoring

Delivery / Runtime

Terraform, Infrastructure as Code, Kubernetes, Helm, Kubernetes platform packaging, Docker, GitLab/Jenkins CI/CD, Traefik, release promotion, rollback planning

Security / Reliability

least-privilege IAM, NSGs, private service paths, authN/authZ, Linux, Grafana, alarms, runbooks, incident triage, cost optimization

Data / Engineering

MLflow, OCI Data Science, Data Flow, Spark, PySpark, Object Storage, Java, Groovy, Python, React, GraphQL, NestJS, MongoDB, MySQL

CERTIFICATIONS

- **Oracle Cloud:** OCI 2025 Certified Architect Associate (expires May 2, 2027); OCI 2024 Certified Foundations Associate (expires October 7, 2026)
- **Cloud Engineering:** Building Scalable Java Microservices with Spring Boot and Spring Cloud – Google / Coursera

EDUCATION & LANGUAGES

Education: Engineering Degree in Computer Science, ENSIAS; CPGE Mathematics
Languages: Arabic, English, French
