Abderrahmane Ouroui

OCI Platform Engineer | DevOps Engineer | Casablanca, Morocco
abdououroui123@gmail.com | aouroui.dev | LinkedIn | GitHub

Professional Summary

OCI-focused Platform / DevOps Engineer building secure, observable production runways with Terraform, OKE/Kubernetes, IAM, networking, CI/CD, and MLOps/data foundations. OCI is my deepest production environment; the standards I apply are cloud-portable: Infrastructure as Code, least-privilege access, release promotion, observability, cost-aware governance, and Kubernetes operating patterns adaptable across AWS, GCP, Azure, or other cloud primitives.

Experience

DevOps Engineer / DevOps Engineer II Sep 2023–Present
Oracle *Casablanca, Morocco*

- Promoted to DevOps Engineer II in October 2025, following the DevOps Engineer role held from September 2023 to September 2025.
- Refactored and migrated Terraform-managed OCI infrastructure while protecting 500+ resources per environment from unnecessary recreation.
- Designed controlled OCI network and identity paths across load balancers, API gateways, Traefik, Kubernetes services, and third-party authN/authZ flows.
- Operated OKE/Kubernetes workloads with release validation, rollback planning, post-release monitoring, and production troubleshooting.
- Started a Platform-as-a-Service project from scratch, shaping the initial architecture, Kubernetes packaging, delivery path, and operating guardrails.
- Built observability patterns using OCI Logging, OCI Monitoring, Grafana dashboards, alarms, and runbooks to improve incident detection and triage.
- Enabled AI/MLOps-ready foundations with OCI Data Science, MLflow, Object Storage, Data Flow, Spark, and model artifact workflows.
- Supported beta programs, workshops, POCs, and GA readiness while mentoring teammates and improving platform adoption.

Research Assistant 2023
Oracle *Casablanca, Morocco*

- Delivered Java/Groovy backend services and CI/CD workflows with Gradle, Jenkins, GitLab, JUnit, and Mockito.

Full Stack / Web Developer 2021–2022
diaaland, INTELLCAP SARL

- Built customer-facing web apps and third-party integrations with React, GraphQL, PHP/WooCommerce, NestJS, MongoDB, Strava, and Garmin.

Projects

OCI / Platform-as-a-Service Foundation | *Terraform, IAM, VCN, OKE, Helm*
- Started a PaaS project from scratch and shaped repeatable dev/test/stage/prod foundations for secure cloud workloads.

Terraform-Safe Migration | *Terraform state, OCI resources, data transition*
- State-aware infrastructure and data migration work with reduced recreation risk.

Secure Network Edge | *API Gateway, Load Balancer, Traefik, AuthN/AuthZ*
- Private ingress and identity-aware access patterns for production services.

OKE Release Runway | *Kubernetes, CI/CD, promotion checks, rollback*
- Kubernetes delivery flow with validation, environment promotion, and rollback readiness.

Observability | *Grafana, OCI Logging, OCI Monitoring, alarms, runbooks*
- Operational visibility for incident triage, reliability checks, and platform health.

MLOps / Data Foundation | *MLflow, Object Storage, Data Flow, Spark/PySpark*
- Reproducible artifact flow for data and ML workflows on OCI.

Technical Skills

Cloud Platform: OCI, IAM, VCN, Load Balancer, API Gateway, Compute, Object/Block Storage, Autonomous Database, OKE, Logging, Monitoring
Delivery / Runtime: Terraform, Infrastructure as Code, Kubernetes, Helm, Kubernetes platform packaging, Docker, GitLab/Jenkins CI/CD, Traefik, release promotion, rollback planning
Security / Reliability: least-privilege IAM, NSGs, private service paths, authN/authZ, Linux, Grafana, alarms, runbooks, incident triage, cost optimization
Data / Engineering: MLflow, OCI Data Science, Data Flow, Spark, PySpark, Object Storage, Java, Groovy, Python, React, GraphQL, NestJS, MongoDB, MySQL

Certifications

Oracle Cloud: OCI 2025 Certified Architect Associate (expires May 2, 2027); OCI 2024 Certified Foundations Associate (expires October 7, 2026)
Cloud Engineering: Building Scalable Java Microservices with Spring Boot and Spring Cloud – Google / Coursera

Education & Languages

Education: Engineering Degree in Computer Science, ENSIAS; CPGE Mathematics
Languages: Arabic, English, French
