DEVOPS / PLATFORM / OCI

Abderrahmane Ouroui

DevOps Engineer II | Platform Engineer

Casablanca, Morocco

abdououroui123@gmail.com | LinkedIn GitHub LeetCode

PROFESSIONAL SUMMARY

DevOps Engineer II / Platform Engineer building reliable production runways on OCI with Terraform, Kubernetes (OKE), secure networking, observability, CI/CD, and MLOps-ready foundations. OCI is my strongest production platform; the engineering standards I apply are cloud-portable across provider primitives, including Infrastructure as Code, least-privilege IAM, Kubernetes runtime patterns, CI/CD promotion, observability, cost awareness, and production governance. Target roles include OCI Platform Engineer, DevOps Engineer, Platform Engineer, and Kubernetes / MLOps Platform Engineer.

EXPERIENCE

DevOps Engineer II / Platform Engineer, Oracle **2023–Present**

Casablanca, Morocco

- Own OCI-native platform architecture across development, test, stage, and production environments.
- Refactored and migrated Terraform infrastructure while protecting **500+ OCI resources per environment** from unnecessary recreation.
- Built reviewable release paths using Terraform boundaries, IAM guardrails, environment promotion checks, and production validation.
- Designed secure networking paths across load balancers, API gateways, reverse proxies, Kubernetes services, application platforms, and third-party authN/authZ flows.
- Deployed and operated Kubernetes clusters on OKE, improving scalability, resilience, and high availability for containerized workloads.
- Managed release lifecycle from development to production, including deployment validation, rollback planning, and post-release monitoring.
- Improved incident detection and triage using OCI Logging, OCI Monitoring, Grafana dashboards, alarms, and operational runbooks.
- Improved platform scalability, performance, and cost efficiency through architecture, configuration, and resource optimization.
- Automated provisioning, orchestration, deployment, scaling, and management of containerized workloads.
- Supported Beta programs, technical workshops, and POCs while contributing to delivery of the team's **first GA product**.
- Owned production operations, troubleshooting platform issues, and improving reliability across environments.
- Mentored team members and supported onboarding, knowledge sharing, troubleshooting, and platform adoption by other teams.
- Enabled AI-ready data foundations using OCI Data Science, MLflow, Object Storage, Data Flow, Spark, and model artifact workflows.

Research Assistant, Oracle **2023**

Casablanca, Morocco

Delivered backend services and CI/CD workflows using Java, Groovy, Gradle, Jenkins, GitLab, JUnit, and Mockito.

Full Stack Developer, diaaland **2022**

Built product workflows and third-party integrations across NestJS, MongoDB, React, Strava, and Garmin.

Web Developer, INTELLCAP SARL **2021**

Delivered marketplace-style web functionality using React, GraphQL, PHP, and WooCommerce.

TECHNICAL SKILLS

Cloud

Oracle Cloud Infrastructure, OKE, Compute, VCN, Load Balancer, API Gateway, IAM, Object Storage, Block Volume, Autonomous Database, OCI Logging, OCI Monitoring

DevOps

Terraform, Infrastructure as Code, Kubernetes, Docker, CI/CD, GitLab, Jenkins, artifact delivery, release management, rollback planning

Operations

Linux, secure networking, NSGs, Traefik, observability, Grafana, incident response, production operations, high availability, cost optimization

Cloud-Portable Standards

Infrastructure as Code, least-privilege IAM, Kubernetes runtime patterns, CI/CD promotion gates, observability, cost awareness, production governance

Databases

Oracle Database, Autonomous Database, MySQL, MongoDB

AI/MLOps

OCI Data Science, OCI Data Flow, Spark, PySpark, MLflow, OCI AI Services, model artifacts, MLOps foundations, AI integration

CERTIFICATIONS

- **Oracle Cloud Infrastructure 2025 Certified Architect Associate**
- **Oracle Cloud Infrastructure 2024 Certified Foundations Associate**
- **Building Scalable Java Microservices with Spring Boot and Spring Cloud – Google**

EDUCATION

Engineering Degree in Computer Science, ENSIAS — **2020–2023**

Morocco

National School of Computer Science and Systems Analysis.

Preparatory Classes in Mathematics, CPGE — **2017–2019**

Morocco

LANGUAGES

Arabic, English, French
